

Instructions

Review the scenario below and complete the tasks as outlined. Once the task is completed, present your screen to the trainer.

Scenario

You realize that including ECG reports in your custom view is important for your work. You also would like to rearrange your custom view as per the specifications below.

Hint: Use the “How to Personalize Your View” tip sheet for assistance.

The screenshot shows the ClinicalViewer interface with six panels:

- Medications:** Dispensed Medications table with columns: Dispensed Date, Generic Name, Brand Name. Results include ERYTHROMYCIN (ILOTYCIN), ACETYSALICYLIC ACID (Novasen), and others.
- Diagnostic Imaging:** View panel with columns: Procedure Date/Time, Report, Image, Procedure Description. Shows "No results available for the selected time interval."
- Other Results:** View panel with columns: Procedure Date/Time, Report, Procedure Name. Results include Stress Echocardiogram, EN Bone Density Report, and ECG.
- Visits/Encounters and Summary:** View panel with columns: Date, Type, Summary Rep..., Organization. Results include ED visits and Ambulatory visits.
- Documents/Notes:** View panel with columns: Document Date/Time, Document, Description. Results include Physician Consult, Triage Note, and Neurology Consult.
- Community:** View panel with columns: Referral Start Date, Referral Type, Reason for Referral. Shows a CCAC Referral for CVA.

Task	Answer / Initials
1. Edit your custom view as per the image above.	
2. When you have finished rearranging your custom view you decide that you would prefer the Summary List View as your default template. Delete the custom view you created.	
3. Congratulations! You have completed the last leg of the race. Please assist other attendees that are still completing their tasks.
