

We want to hear from you!

Seeking health care provider feedback for ONE Access Project.

What is ONE Access?

The goal of the ONE Access project is to simplify and harmonize how providers discover, register for and access digital health services.

The project is focused on delivering access to multiple applications through a single online platform, that enables provider access to health records, related health information, tools and services.

What is the opportunity?

As part of the ONE Access project, we are seeking **10-14 physicians** to share their experience accessing patient health information and using digital health products, and to test a new digital product currently under development.

We hope to learn about your needs and expectations for accessing health information and services, how you are currently using digital health products - such as clinical viewers or other tools and services - to view patient medical records, monitor patient health, etc.

You will be invited to share your feedback through one-on-one interviews and usability tests. There may also be future opportunities to join an advisory group or participate in group meetings to provide feedback on ONE Access services.

Note: all participants will be required to sign a privacy and confidentiality agreement prior to participating in this project.

What's the time commitment?

One-time 45-60 minutes interview, **or** monthly one-hour sessions for 12 months.

Initial sessions: will be held between 8-14 April, 2022 (dates and times are flexible based on your availability)

Location

All sessions will be held **virtually** through video conference (or audio only if preferred).

How to apply

[Complete a short application form](#) to register your interest.
